

ProDigest wins Life Science Technology Award in the Deloitte Technology Fast 50 Competition

Ghent, 17 Nov 2016 - ProDigest wins the prestigious Deloitte Technology Fast 50 award for technology companies active in Life Sciences and headquartered in Belgium. With an impressive 301% growth, ProDigest moves into the first position in its category.

The esteemed Deloitte Technology Fast50 annual award honors the fastest growing technology companies. The selection process is based on the percentage of operational revenue growth over the past five-year period. The award was created to showcase the remarkable contribution of technology companies to the growth of the economy.

“We are extremely pleased to have won this prestigious award”, stated Sam Possemiers, CEO of ProDigest. “The Deloitte Technology Fast 50 award gives great visibility to technology companies and is internationally recognized as being one of the most important business awards in our sector. It is therefore a superb recognition for the efforts of the complete ProDigest team in lifting ProDigest to a higher level. While already ending at a nice 19th position at our first participation last year, the rapid expansion of the company has allowed us to further improve our ranking and win this award. We are fortunate to have an incredibly talented, hard-working and passionate team of experts at ProDigest.”

About the company

ProDigest is a company that develops unique laboratory models of the complete gastrointestinal tract of humans and animals. It markets the Simulator of the Human Intestinal Microbial Ecosystem (SHIME®), a unique enabling technology used to provide pre-clinical services to functional food/feed and pharma companies in order to assess the fate of actives and ingredients during digestive processes and their mechanism of action in relation to human and animal health.

About the Deloitte Technology Fast 50

The Deloitte Technology Fast 50 competition is an annual selection of the 50 fastest growing and innovative technology companies headquartered in Belgium. Public or private companies who develop a technology related product or service and who have experienced substantial revenue growth over the last four years can enter the competition for their chance to be nominated as one of the 50 fastest-growing technology companies in Belgium.

Companies that have been active in the technology sector for less than five years can participate in the special Rising Star category of the competition. These companies are judged by an independent jury on their turnover potential and scalability.

Participating in the Deloitte Fast 50 competition can help companies to develop their business by increasing their visibility and giving them access to the Fast 50's unique network of highly successful executives.
